

Matteo Gagliardi

Software Developer

Profile

I am a passionate software developer with a strong proficiency in TypeScript, JavaScript, with knowledge of SQL and relational databases. My expertise extends to mobile development using Flutter, where I have applied my skills to personal projects focused on intuitive and efficient mobile design. I thrive on problem-solving and continuously seek to enhance my knowledge and capabilities in the ever-evolving field of software development.

Employment History

Specialist Software Developer at TrueBlue, Verona

February 2022 — Present

- **Feature Implementation:**
 - Developed and integrated new features into an existing proprietary CRM system using mostly TypeScript and SQL, but also HTML and CSS, VBA

★ Personal projects

Flutter Demo App

https://github.com/mgagliardidev/flutter_restaurant_app_demo

Cross-platform mobile app written in Flutter/Dart simulating a restaurant app - with Firebase as backend and Provider as state management package.

Flutter Store App - In Progress

https://github.com/mgagliardidev/store_app

A more complex cross platform app that simulates a generic online store.

It uses Supabase as database (postgres) and data storage and Riverpod as state management package.
